SPECIAL TOPICS IN BIOLOGY
BIOL 1000

Class Hours: 1-4  Credit Hours: 1-4
Lab Hours: 0-4  Date Revised: Fall 2010

Catalog Course Description:
Study and discussion of a selected topic in biology. Content will vary, as this course is a means for classes to explore certain biology-related topics in depth. Classes may be taught by visiting professors. May be repeated for a total of 6 credit hours.

Entry Level Standards:
The student should have a good basic understanding of science and an interest in studying a topic in depth. The student should also be able to write well, as the course may involve written papers.

Prerequisites:
Consent of instructor

Textbook(s) and Other Course Materials:
Textbooks will vary, depending on the course topic and the instructor.

I. Week/Unit/Topic Basis:
Activities will vary according to course content and may include lectures, discussions, field trips, laboratory experiments, essays, and term papers.

II. Course Objectives*:
A. Develop an understanding of a particular aspect of biology. I.5
B. Develop an understanding of technological advances of a particular aspect of biology. I.5, V
C. Know how to read a scientific paper critically. I.2, III.2
D. Develop critical thinking skills and problem solving skills to review and analyze information relating to the selected topic. III.1, III.2
E. Develop an appreciation of the societal issues involved with the special topic, when appropriate. IV

*Roman numerals after course objectives reference TBR’s general education goals.

III. Instructional Processes*:
Students will:
1. Engage in teamwork to facilitate cooperative learning. Active Learning Strategies
2. Approach problems both mathematically and verbally.  
   Communication Outcome, Problem Solving and Decision Making Outcome, Numerical Literacy Outcome

3. Use critical thinking skills to solve problems. This will be done in groups to promote idea sharing.  
   Problem Solving and Decision Making Outcome, Active Learning Strategies

4. Use critical thinking skills to evaluate scientific literature.  
   Communication Outcome, Information Literacy Outcome

5. Learn about appropriate technologies.  
   Technological Literacy Outcome

6. Gain the knowledge to have a foundation in the selected topic, assisting the student in moving on to upper level science courses and eventually to the job. This will be done by a variety of means, including listening to lectures, experimenting (when appropriate), participating in field trips, viewing video tapes and video discs, and participating in group discussions.  
   Communication Outcome, Personal Development Outcome, Numerical Literacy Outcome, Transitional Strategies, Active Learning Strategies

7. Use discussions to evaluate the societal implications involved with the special topic.  
   Personal Development Outcome, Cultural Diversity and Social Adaptation Outcome

*Strategies and outcomes listed after instructional processes reference TBRs goals for strengthening general education knowledge and skills, connecting coursework to experiences beyond the classroom, and encouraging students to take active and responsible roles in the educational process.

IV. Expectations for Student Performance*:

Upon successful completion of this course, the student should be able to:

1. Discuss basic and advanced facts associated with the selected topic.  
   A

2. Discuss implications for society and for the future based on information regarding the selected topic.  
   A, B, E

3. Understand the manner in which the special topic fits into the overall picture of biology.  
   A,D

4. Read a scientific paper.  
   C, D

5. Write a scientific paper.  
   C, D

6. Discuss and use (depending on the course) appropriate technologies.  
   A, B

*Letters after performance expectations reference the course objectives listed above.

V. Evaluation:

A. Evaluation Procedures:

   The specific evaluation methods will vary according to the course content. However, essay test questions, participation in class activities, and written out-of-class papers will all be a part of the evaluation process. The course syllabus distributed on the first day of class will give specifics.

B. Grading Scale:
VI. Policies:

A. Attendance Policy:

Pellissippi State expects students to attend all scheduled instructional activities. As a minimum, students in all courses (excluding distance learning courses) must be present for at least 75 percent of their scheduled class and laboratory meetings in order to receive credit for the course. Individual departments/programs/disciplines, with the approval of the vice president of Academic Affairs, may have requirements that are more stringent. In very specific circumstances, an appeal of the policy may be addressed to the head of the department in which the course was taken. If further action is warranted, the appeal may be addressed to the vice president of Academic Affairs.

B. Academic Dishonesty:

Academic misconduct committed either directly or indirectly by an individual or group is subject to disciplinary action. Prohibited activities include but are not limited to the following practices:

- Cheating, including but not limited to unauthorized assistance from material, people, or devices when taking a test, quiz, or examination; writing papers or reports; solving problems; or completing academic assignments.
- Plagiarism, including but not limited to paraphrasing, summarizing, or directly quoting published or unpublished work of another person, including online or computerized services, without proper documentation of the original source.
- Purchasing or otherwise obtaining prewritten essays, research papers, or materials prepared by another person or agency that sells term papers or other academic materials to be presented as one’s own work.
- Taking an exam for another student.
- Providing others with information and/or answers regarding exams, quizzes, homework or other classroom assignments unless explicitly authorized by the instructor.
- Any of the above occurring within the Web or distance learning environment.

C. Accommodations for disabilities:

Students who need accommodations because of a disability, have emergency medical information to share, or need special arrangements in case the building must be evacuated should inform the instructor immediately, privately after class or in her or his office. Students must present a current accommodation plan from a staff member in Services for Students with Disabilities (SSWD) in order to receive accommodations in this course. Services for Students with Disabilities may be contacted by going to Goins 127, 132, 134, 135, 131 or by phone: 539-7153 or TTY 694-6429. More information is available at http://www.pstcc.edu/sswd/.

D. Other Policies:

Classroom disruptions during lecture or laboratory, any form of communication during testing, or any other form of behavior that may prove distracting to others will not be tolerated and may lower the final grade.
