PELLISSIPPI STATE COMMUNITY COLLEGE
MASTER SYLLABUS

CAPSTONE LAB
CSIT 2850

Class Hours: 0.0          Credit Hours: 2.0
Laboratory Hours: 4.0     Revised: Spring 2014

NOTE: This course is not intended for transfer credit.

Service Learning: This course uses Service-Learning in its teaching strategy. A key component of Service Learning is the chance to apply what you are learning in the classroom to real life situations via community partners.

Catalog Course Description:

In this project-centered course, students apply conceptual and technical knowledge acquired during their entire program of study to develop a complete IT-based solution for a client organization. Students practice software engineering principles, various methods, tools, techniques and documentation through team projects. Emphasis is placed on business systems’ characteristics, prototyping and SDLC phases. This course should be taken during the final semester.

Entry Level Standards:

Students are expected to have a fundamental knowledge of database concepts and should have strong mastery of one programming language. Problem solving skills will be essential. Experience of Visual programming as well as object-oriented programming is preferred.

Prerequisites:

CSIT 2210 or CSIT 2220 or CSIT 2230 or CSIT 2240 or CSIT 2250 or CSIT 2260 or CSIT 2270 or CSIT 2280 or CSIT 2290 or CSIT 2510 or CSIT 2520 or CSIT 2530; and CSIT 2840; and ENGL 1010

Textbook(s) and Other Course Materials:

Required Textbook: None

Suggested Reading Materials:

a. UML, A Beginner’s Guide, by Jason Roff
b. Software Engineering, by Ian Sommerville
c. Object-Oriented Systems Analysis and Design, by George, Batra, Valacich, and Hoffer
d. Software Project Management, by Joel Henry
g. Systems Analysis and Design Methods: by Jeffrey Whitten, and Lonnie Bentley
h. Object-Oriented and Classical Software Engineering, 8th Edition by Stephen Schach
I. Week/Unit/Topic Basis:

The primary assignment in this course is to complete a software application and its associated artifacts (requirements specifications, design, prototyping, progress reports, checklists, and coding, testing, and final reports). The team project consists of meeting with members of a client organization, gathering relevant information from them, and developing a prototype information system to implement the solutions.

A projected semester plan follows:

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-2</td>
<td>Setting up the teams and meeting with client companies</td>
</tr>
<tr>
<td>3-7</td>
<td>Construct a plan, gather facts, design, and work as a team, communicating with the client as each milestone is reached</td>
</tr>
<tr>
<td>8</td>
<td>Walkthrough of the projects</td>
</tr>
<tr>
<td>9-13</td>
<td>Refine, continue development of the team project</td>
</tr>
<tr>
<td>14</td>
<td>Presentation of projects to outside companies</td>
</tr>
<tr>
<td>15</td>
<td>Final Exam Period</td>
</tr>
</tbody>
</table>

II. Course Goals*:

The course will

A. Build the skills to plan, analyze, design and develop a well-documented project based on end-user request. I, II, III, IV, V

B. Foster the students’ ability to demonstrate through group discussion how to approach a problem and come up with different solutions. I, V

C. Increase the students’ capacity to practice elements of the work ethic such as punctuality, professionalism, dependability, cooperation, and contribution. I

D. Advance students’ skills at participating productively on a software development team. I

E. Require students present a finished product to the client and class. I, II, IV

F. Require students participate in a peer review of team projects. I

G. Build on students’ skills at managing time and efforts as a team to achieve the semester project goal. I, V

H. Develop students’ ability to effectively write and speak to communicate among team members as well as with outside clients. I

I. Require teams of students to design and develop programs for local businesses or community agencies, making use of the most current programming and database technologies. I

*Roman numerals after course objectives reference goals of the CSIT program.
III. Expected Student Learning Outcomes*:

Students will be able to:

1. Construct a plan by using Project Management tools for system study through teamwork and cooperation. (A, B, D, G)
2. Create Requirement Definition Document based on client request. (A, B, C, D, H)
3. Present the software solution to class. (E)
4. Evaluate team members’ project and participation. (F)
5. Develop software solution after a complete system study of the client’s request. (A, C, D, H)

* Capital letters after Expected Student Learning Outcomes reference the course goals listed above.

IV. Evaluation:

A. Testing Procedures:

Students are evaluated primarily on the basis of team project. There will be a walkthrough mid semester that will comprise part of the grade. In addition, there will be an oral presentation to client companies at the end of semester.

B. Laboratory Expectations: 70% of grade

Students are expected to complete a team project addressing a REAL problem, which the students will identify, at a REAL organization. Project success will depend on the joint commitments of participants including: the students working effectively together on a given team; the ongoing support of the sponsor to clarify requirements and address issues of scope and feasibility; and the instructor to coach, advise and oversee progress and help address planning and implementation challenges.

Students are expected to apply good software engineering practices in the conduct of their work. This includes organizing effective teams, planning their work, coordinating their meetings and activities with each other, their sponsor and the instructor, documenting project requirements, designing, constructing and testing their solution.

The team will define the requirements and formulate its project during the first few weeks, then apply the tools and techniques of systems analysis and design learned in previous semester to develop, design, code, and implement the team’s system. CASE tools, Visual tools, UML modeling tools, Database, MS Project, various programming languages, and prototyping tools may be used in development of the team project. Each team will produce a document which will have the following information:

   a. Planning(project management tool to set up milestones)
   b. Gathering Requirements (interview, record review)
   c. Analysis(Use Cases, other UML modeling tools)
   d. Design(prototyping user interface)
   e. Database design
   f. Implementation(Various DB and programming languages)

C. Field Work: 15 % of grade

Research for the various prototyping tools, programming languages and databases will comprise the fieldwork.
D. Other Evaluation Methods: 15% of grade.

The student’s participation in the development of the project from initiation through presentation and cooperation with team members is the basis for this grade. The prospect of working in a team carries the possibility that not all team members will pull their fair share of the load. For this reason, there will be a confidential peer evaluation during the semester.

E. Grading Scale:

<table>
<thead>
<tr>
<th>Score Range</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>93 – 100</td>
<td>A</td>
</tr>
<tr>
<td>88 – 92</td>
<td>B+</td>
</tr>
<tr>
<td>83 – 87</td>
<td>B</td>
</tr>
<tr>
<td>78 – 82</td>
<td>C+</td>
</tr>
<tr>
<td>73 – 77</td>
<td>C</td>
</tr>
<tr>
<td>65 – 72</td>
<td>D</td>
</tr>
<tr>
<td>Below 65</td>
<td>F</td>
</tr>
</tbody>
</table>

V. Policies:

A. Attendance Policy:

Pellissippi State expects students to attend all scheduled instructional activities. As a minimum, students in all courses (excluding distance learning courses) must be present for at least 75 percent of their scheduled class and laboratory meetings in order to receive credit for the course. Individual departments/programs/disciplines, with the approval of the vice president of Academic Affairs, may have requirements that are more stringent. In very specific circumstances, an appeal of the policy may be addressed to the head of the department in which the course was taken. If further action is warranted, the appeal may be addressed to the vice president of Academic Affairs.

B. Academic Dishonesty:

Academic misconduct committed either directly or indirectly by an individual or group is subject to disciplinary action. Prohibited activities include but are not limited to the following practices:

• Cheating, including but not limited to unauthorized assistance from material, people, or devices when taking a test, quiz, or examination; writing papers or reports; solving problems; or completing academic assignments.
• Plagiarism, including but not limited to paraphrasing, summarizing, or directly quoting published or unpublished work of another person, including online or computerized services, without proper documentation of the original source.
• Purchasing or otherwise obtaining prewritten essays, research papers, or materials prepared by another person or agency that sells term papers or other academic materials to be presented as one’s own work.
• Taking an exam for another student.
• Providing others with information and/or answers regarding exams, quizzes, homework or other classroom assignments unless explicitly authorized by the instructor.
• Any of the above occurring within the Web or distance learning environment.

Please see the Pellissippi State Policies and Procedures Manual, Policy 04:02:00 Academic/Classroom Conduct and Disciplinary Sanctions for the complete policy.

C. Accommodations for disabilities:

Students that need accommodations because of a disability, have emergency medical
information to share, or need special arrangements in case the building must be evacuated should inform the instructor immediately, privately after class or in her or his office. Students must present a current accommodation plan from a staff member in Services for Students with Disabilities (SSWD) in order to receive accommodations in this course. Services for Students with Disabilities may be contacted by sending email to disabilityservices@pstcc.edu, or visiting Goins 127, 132, 134, 135, 131. More information is available at http://www.pstcc.edu/sswd/.

D. Other Policies:

Computer Usage Guidelines:
College-owned or -operated computing resources are provided for use by students of Pellissippi State. All students are responsible for the usage of Pellissippi State's computing resources in an effective, efficient, ethical and lawful manner. (Pellissippi State Online Catalog)

Students are expected to promptly attend all classes as assigned. If a class is missed, student must make up all work and get notes and/or handouts.
