Class Hours: 2.0  Credit Hours: 3.0
Laboratory Hours: 2.0  Revised: Fall 2013

Catalog Course Description:

MATH 0800 builds competency in applying number sense, operating with real numbers and algebraic expressions, solving equations, modeling, and critical thinking. The course focuses on implementing problem solving strategies and developing mathematical connections, as well as developing study skills and communicating mathematically. Successful completion of MATH 0800 satisfies the requirements for Learning Support Mathematics Competencies 1, 2, & 4.

Entry Level Standards:

ACT or COMPASS scores and scores earned on the Pellissippi math placement test will be used to determine placement in the class.

Prerequisites:

Placement Test score of 0, 1, 2, or 3

Corequisites:

COLL 1500 or MATH 0820

Textbook(s) and Other Course Materials:

License for Carnegie Learning
Classroom Activity Packet
Review Packet
The TI-83 or TI-83 Plus or TI-84 graphics calculator is required. A symbolic manipulator such as the TI-89 or TI-92 is not permitted.
Headphones/earphones for use in the Learning Commons

I. Week/Unit/Topic Basis:

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Learning styles; email; online course; introduction to equations; integers</td>
</tr>
<tr>
<td>2</td>
<td>Patterns and expressions; one-step equations;</td>
</tr>
<tr>
<td>3</td>
<td>Unit conversions; fraction, decimal, and percent conversions;</td>
</tr>
<tr>
<td>4</td>
<td>Rational and irrational numbers; order of operations;</td>
</tr>
</tbody>
</table>
II. Course Goals*:

The course will

A. Engage the student in substantial mathematical problem solving. VI. 1,2,4

B. Expand student understanding of mathematics through modeling real-world situations. VI. 1,3,4

C. Foster the ability to read, write, listen to, and speak mathematics. I. 1,2,6

D. Use appropriate technology to enhance mathematical thinking and understanding and to judge the reasonableness of results. VI. 2,5; VII. 1,4,5,6

E. Build the skills to perform arithmetic operations, as well as reason and draw conclusions from numerical information. VI. 1,2,6

F. Build the skills to select, use, and translate among mathematical representations – numerical, graphical, symbolic, and verbal – to organize information and solve problems using a variety of techniques. VI. 1,2,6

G. Increase student tenacity and confidence in the ability to use mathematics. VI. 3,4

*Roman numerals after course objectives reference TBRs general education goals.

III. Expected Student Learning Outcomes*:

Students will be able to:

1. Write equations to represent real world problems involving addition, subtraction, or multiplication. B,C,G

2. Add and subtract integers using a number line model. F,G
3. Enter and find input and output values for real world problems in a table of values. 
   A,B,C,D,E,F,G

4. Represent real world scenarios with algebraic expressions using one operation. 
   B,C,F,G

5. Solve linear equations involving one operation. 
   E,F

6. Determine equivalent measure of length, weight or mass, volume, or time within the same system when given either customary or metric units of measurement. 
   A,B,D,E

7. Write decimals as fractions or mixed numbers. 
   D,E

8. Write fractions and mixed numbers as decimals using equivalent fractions or division. 
   D,E

9. Write decimals as percents, including percents greater than 100 or less than 1. 
   D,E

10. Locate and order real numbers on a number line using various scales. 
    D,E,F

11. Add, subtract, multiply, and divide rational numbers. 
    D,E

12. Use the order of operations to simplify numeric expressions. 
    D,E

13. Find area and perimeter (or circumference) of rectangles, triangles, and circles. 
    A,B,D,E

14. Represent real world scenarios with algebraic expressions using two operations. 
    B,C,G

15. Write and simplify ratios. 
    B,C,D,E

16. Calculate and compare unit rates. 
    A,B,C,D,E

17. Write and solve proportions using equivalent fractions or means-extremes property. 
    A,B,C,D,E,F,G

18. Use percent proportions to find the percent of a number, a percent given two numbers, or a total quantity in real world problems. 
    A,B,C,D,E,F,G

19. Find powers and approximate square roots. 
    D,E

20. Add and subtract polynomials. 
    E,F

21. Multiply polynomials using factor tables or the distributive property. 
    E,F

22. Simplify expressions involving integer exponents using the product and quotient rules for exponents. 
    E,F

23. Identify quantities and units in real world problems. 
    B,C,G

24. Identify and find independent and dependent values numerically in real world problems. 
    A,B,C,D,E,F,G

25. Write algebraic expressions to represent linear models in real world problems with positive or negative rates of change and starting points, or using ratios. 
    B,C,F,G

26. Interpret coordinates of a point on linear models for real world problems. 
    B,C,F,G

27. Solve one-step and two-step equations with similar terms, variables on both sides, and variables in the denominator. 
    D,E,F
28. Apply the distributive property to multiply and factor expressions. E,F
29. Solve formulas and literal equations for a specified variable. A,F
30. Represent simple and compound inequalities on a number line. B,E,F
31. Solve simple and compound inequalities in one variable. D,E,F

* Capital letters after Expected Student Learning Outcomes reference the course goals listed above.

**IV. Evaluation:**

A. Testing Procedures:

Students must score at least 80% on each test to complete the course.

B. Laboratory Expectations:

Students will work in the Learning Commons to complete interactive mathematics instruction and other activities based on various learning styles.

C. Field Work:

N/A

D. Other Evaluation Methods:

The grade for each course will be determined by points earned on the tests and the course requirements grade. Classroom attendance, classroom participation, assignments, and Learning Commons’ attendance determine a student’s Course Requirements Grade (CRG). Students will not be allowed to take a course test if their current Course Requirements Grade is below 80%.

Final Grade:
Tests: 2/3
CRG: 1/3

E. Grading Scale:

A = 94 - 100
B = 87 – 93
C = 80 – 86
F = below 80

**V. Policies:**

A. Attendance Policy:

Pellissippi State expects students to attend all scheduled instructional activities. As a minimum, students in all courses (excluding distance learning courses) must be present for at least 75 percent of their scheduled class and laboratory meetings in order to receive credit for the course. Individual departments/programs/disciplines, with the approval of the vice president of Academic Affairs, may have requirements that are more stringent. In very specific circumstances, an appeal of the policy may be addressed to the head of the department in which the course was taken. If further action is warranted, the appeal may be addressed to the vice president of Academic Affairs.

B. Academic Dishonesty:
Academic misconduct committed either directly or indirectly by an individual or group is subject to disciplinary action. Prohibited activities include but are not limited to the following practices:

- Cheating, including but not limited to unauthorized assistance from material, people, or devices when taking a test, quiz, or examination; writing papers or reports; solving problems; or completing academic assignments.
- Plagiarism, including but not limited to paraphrasing, summarizing, or directly quoting published or unpublished work of another person, including online or computerized services, without proper documentation of the original source.
- Purchasing or otherwise obtaining prewritten essays, research papers, or materials prepared by another person or agency that sells term papers or other academic materials to be presented as one’s own work.
- Taking an exam for another student.
- Providing others with information and/or answers regarding exams, quizzes, homework or other classroom assignments unless explicitly authorized by the instructor.
- Any of the above occurring within the Web or distance learning environment.

Please see the Pellissippi State Policies and Procedures Manual, Policy 04:02:00 Academic/Classroom Conduct and Disciplinary Sanctions for the complete policy.

C. Accommodations for disabilities:

Students that need accommodations because of a disability, have emergency medical information to share, or need special arrangements in case the building must be evacuated should inform the instructor immediately, privately after class or in her or his office. Students must present a current accommodation plan from a staff member in Services for Students with Disabilities (SSWD) in order to receive accommodations in this course. Services for Students with Disabilities may be contacted by sending email to disabilitieservices@pstcc.edu, or visiting Goins 127, 132, 134, 135, 131. More information is available at http://www.pstcc.edu/sswd/.

D. Other Policies:

In addition to other possible disciplinary sanctions that may be imposed as a result of academic misconduct, the instructor has the authority to assign either (1) an F or zero for the assignment or (2) an F for the course.

Cell Phones: Cellular telephones and other devices with photographic imaging capabilities must be turned off and cannot be visible during any Pellissippi State instructional or testing activity. Students who violate this policy during an instructional activity will be asked to leave the classroom or other instructional area; a violation of the policy during a test or other evaluation activity will be considered cheating and the student will be given a zero for that activity or an F for the module.

Withdrawal: Students placed and enrolled in a Learning Support course are not permitted to withdraw except for serious documented circumstances. Students wishing to withdraw should discuss this matter first with their mathematics instructor and then must confer with a counselor. The counselor will notify the student of the decision to allow him or her to withdraw.
