PELLISSIPPI STATE COMMUNITY COLLEGE
MASTER SYLLABUS

HUMAN ANATOMY & PHYSIOLOGY II
BIOL 2020 Hybrid

Class Hours: 3.0                  Credit Hours: 4.0
Laboratory Hours: 3.0            Date Revised: Fall 2015

Catalog Course Description:

A study of the anatomy and physiology of blood and the circulatory, immune, respiratory, digestive, excretory, endocrine, and reproductive systems. Course includes three hours of lecture and three hours of laboratory applications each week.

Entry Level Standards:

Eligible for enrollment in ENGL 1010 and college level math courses.

Prerequisite:

BIOL 2010

Textbook(s) and Other Course Materials:

2) DVD series: Understanding the Human Body: An Introduction to Anatomy and Physiology, Great Courses/The Teaching Company. To be checked out from Educational Technology Services at PSCC.

4) Online supplement: Mastering A&P access with E-book. (~ $60 if separate from textbook).

I. Week/Unit/Topic Basis:

<table>
<thead>
<tr>
<th>Week</th>
<th>Lecture Topic</th>
<th>Lab Topic</th>
</tr>
</thead>
</table>
II. Course Goals*:

This course is the second half of a sophomore level human anatomy and physiology sequence, primarily dealing with the structure and function of several internal body systems. Students will develop:

A. An understanding of the relationship between cells, tissues, organs, and systems. (V4)

B. An understanding of the relationship between structure and function for each system covered. (V4)

C. A body of knowledge regarding the anatomy and physiology of the human systems covered. (V4)

D. An understanding of the homeostatic control of the human systems covered. (V4)

E. An understanding of how the systems covered function holistically to control the functioning of the human body. (V4)

F. An understanding of the relationship between abnormal anatomy and/or physiology and health-related problems. (V4, V5)

G. An ability to use medical resources to aid in the analysis of medical data and determination of a diagnosis and treatment of some health problems. (V2, V3, V4)

H. An understanding of various laboratory techniques and equipment common to the study of anatomy and physiology. (V1)
III. Expected Student Learning Outcomes*

The student will be able to:

1. Explain the anatomy and physiology of the following systems: C,A,B
   A. Endocrine
   B. Cardiovascular
   C. Immune
   D. Lymphatic
   E. Respiratory
   F. Digestion
   G. Urinary
   H. Reproductive

2. Explain the homeostatic mechanisms involved in controlling the systems above. (D

3. Describe how many of the body systems work holistically to control the functioning of the body. E

4. Interpret and analyze simple medical data. F,G

5. Consult leading medical references to aid in the understanding the diagnosis and treatment of health problems. F,G

6. Use the compound microscope to examine tissues and recognize various structures of tissues. H,C,A

7. Identify various anatomical parts on pictures, models and the cadaver. C,H,A

8. Perform various laboratory techniques, such as white blood cell count and urinalysis, successfully. H

* Capital letters after Expected Student Learning Outcomes reference the course goals listed above.

IV. Evaluation:

A. Testing Procedures:

   There will be 3 major lecture exams, 11 chapter tests and 4 laboratory practical exams. The laboratory practical exams will be all short answer exams are worth 50 points. In laboratory, there will be an additional 50 points of lab activities. In lecture, all chapter exams will be multiple choice or matching online and are worth 25 points each. There will also be case study quizzes worth 10 points each, and Interactive Physiology worksheets worth 10 points each. All exams will be proctored in the testing center and may be online or on paper and may include multiple choice, matching and essay questions. The exams are worth 100 points each.

   Chapter Tests = 250 pts.
   Case Study Quizzes = 100 pts.
   IP worksheets = 100 pts.
   Exam 1 Endocrine & Reproductive Systems= 75 pts.
   Exam 2 Heart and Blood Vessels=75 pts.
   Exam 3 Blood, Body Defenses, Respiration= 75 pts.
   Exam 4 Urinary, FE &pH, Digestion, Metabolism = 75pts
Lecture is worth 750 points or 75% of the grade.

B. Laboratory Expectations:

Students are expected to attend lab every week and complete the laboratory activities assigned to each lab. Student work will be checked by the lab instructor before the student may leave the laboratory each week. Completed laboratory activities are worth 20% of the lab grade. The remainder of the laboratory grade is earned on the laboratory practical exams worth 80% of the lab grade.

Practical 1 = 50 pts.
Practical 2 = 50 pts.
Practical 3 = 50 pts.
Practical 4 = 50 pts.
Lab Activities = 50 pts
Laboratory is worth 250 points or 25% of the grade.

C. Field Work:

D. Other Evaluation Methods:

Extra Credit is not available for this course.

E. Grading Scale:

There will be a total of 1000 points offered in the course (750 pts. in lecture, 250 pts. in laboratory). In order to pass the course, the student must earn 60% of the points offered in both lecture and laboratory sections of the course. If this has been achieved, then the points earned from lecture and laboratory will be added together and compared to the following grading scale:

900-1000 points (90%-100%) = A
870-899 points (87-89.9%) = B+
800-869 points (80-86.9%) = B
770-799 points (77-79.9%) = C+
700-769 points (70-76.9%) = C
600-699 points (60-69.9%) = D
599 or less points (<60 %) = F

VI. Policies:

A. Attendance Policy:

Pellissippi State expects students to attend all scheduled instructional activities. As a minimum, students in all courses (excluding distance learning courses) must be present for at least 75 percent of their scheduled class and laboratory meetings in order to receive credit for the course. Individual departments/programs/disciplines, with the approval of the vice president of Academic Affairs, may have requirements that are more stringent. In very specific circumstances, an appeal of the policy may be addressed to the head of the department in which the course was taken. If further action is warranted, the appeal may be addressed to the vice president of Academic Affairs.
B. Academic Dishonesty:

Academic misconduct committed either directly or indirectly by an individual or group is subject to disciplinary action. Prohibited activities include but are not limited to the following practices:

- Cheating, including but not limited to unauthorized assistance from material, people, or devices when taking a test, quiz, or examination; writing papers or reports; solving problems; or completing academic assignments.
- Plagiarism, including but not limited to paraphrasing, summarizing, or directly quoting published or unpublished work of another person, including online or computerized services, without proper documentation of the original source.
- Purchasing or otherwise obtaining prewritten essays, research papers, or materials prepared by another person or agency that sells term papers or other academic materials to be presented as one’s own work.
- Taking an exam for another student.
- Providing others with information and/or answers regarding exams, quizzes, homework or other classroom assignments unless explicitly authorized by the instructor.
- Any of the above occurring within the Web or distance learning environment.

Please see the Pellissippi State Policies and Procedures Manual, Policy 04:02:00 Academic/Classroom Conduct and Disciplinary Sanctions for the complete policy.

C. Accommodations for disabilities:

Students that need accommodations because of a disability, have emergency medical information to share, or need special arrangements in case the building must be evacuated should inform the instructor immediately, privately after class or in her or his office. Students must present a current accommodation plan from a staff member in Disability Services (DS) in order to receive accommodations in this course. Disability Services may be contacted by sending email to disabilityservices@pstcc.edu, or by visiting Alexander 130. More information is available at http://www.pstcc.edu/sswd/.

D. Other Policies:

**Course essentials related to students with disabilities.** The course objectives include the requirement that students use correct terminology, to include correct spelling, when demonstrating that they recognize body structures and their functions. This course lays the foundational framework for further understand of the body in various health-related disciplines such as Nursing and Radiology Technology. Essential to this understanding is the ability to quickly recognize structures and be able to correctly spell the names of those structures on patient records. As part of the test of this essential objective, lab practicals involve timed stations (90 seconds each) where students must recognize a structure, identify it and record that identity with correct spelling within the allotted time. Thus spelling and timely answers are part of the essential learning objectives and are not subject to accommodation. If a student’s accommodation allows for extra time on an exam it will be made available to the student after the regular timed portion of the lab exam is over. Lecture exams have the same spelling requirements, but since individual questions are not timed, extra time will be allotted per the student accommodation plan.

Out of class assignments listed on the syllabus at the beginning of the semester have firm due dates because they are accessible on the first day of classes. These assignments are designed to complement the information covered in assigned chapters for that week and therefore it is in the student’s best interest to complete the assignments by the due date given at the beginning of the semester. Time extensions beyond the week the assignment is due will not be made.
Students should begin working on these assignments immediately, create a plan and timeline to meet their individual learning needs for assignment completion and manage their time appropriately throughout the semester so that deadlines for these assignments are met. This applies, but is not limited to, case studies, chapter quizzes and Interactive Physiology worksheets or other assignments which are assigned and accessible at the beginning of the semester.

Visitors: No visitors are allowed in lecture or laboratory unless given permission by the instructor.

Late Work: No late work will be accepted unless otherwise indicated by the instructor.

Make-Up Lecture Exams: Since students will have a week to take a proctored exam, there should be no need for make-up exams. However, if catastrophe occurs then the make-up exam will only be given if the original exam was missed due to severe illness (must have a doctor’s or hospital note), court appearance (must have court papers) or death in the family (must have appropriate documentation). Student must contact the instructor within 24 hours of the missed exam.

Laboratory Make-Up Practicals: If a student misses a lab practical, then arrangements should be made with the instructor for the student to take the exam with another lab section. A make-up exam will only be given if the original exam was missed due to severe illness (must have a doctor’s or hospital note), court appearance (must have court papers) or death in the family (must have appropriate documentation). Student must contact the instructor within 24 hours of the missed exam.

Laboratory Policies:
1. The laboratory contains biohazardous materials, such as a human cadaver, there will be no food, tobacco, or drink consumption in lab nor open containers of these items.
2. Shoes will have a covered heel and covered toe design.
3. Students are expected to attend the lab section they are assigned to.
4. If a student must miss their assigned lab, they are expected to make up the lab the same week as the missed lab in another section. However, prior approval from both instructors must be granted before the make-up lab is attended. If a student attends another lab section, then that instructor should check out the student and initial the student’s work. The student should show completed work to the regular instructor upon return to the regularly scheduled lab class. If a student was unable to attend another lab section, then the student must complete work on his own and show the completed chapter (s) to the lab instructor upon returning.

On-line Course (D2L)
1. This lecture course is an on-line lecture through the Desire to Learn (D2L) on-line courses system at PSTCC. Your instructor will provide instructions for accessing on-line materials during the orientation.
2. Information available on-line will include: Access to Mastering A&P, Learning Assignments for each Chapter, Chapter Exams, Case Studies and Case Study Quizzes, Exams, and Lab Supplements and links to useful sites related to A&P.
3. The college provides ample computer access for students that don’t own their own computer. Therefore, students are expected to be able to access on-line materials on a regular basis and are responsible for assignments posted there.

Student Participation in Dissections. Dissections are an integral part of BIOL 2010 and are therefore mandatory. This will include a dissection/observation of a human cadaver. All students enrolled in the course are expected to fully participate. However, in consideration of medical, religious, or moral objections of isolated individuals, students wishing to be excused
from the actual dissection may petition for a waiver by submitting a written request to the lead instructor. Students that are pregnant should consult their physician regarding their participation in dissection labs. With proper documentation, waivers may be granted and alternate activities may be arranged. Students granted waivers will only be excused from the physical dissection itself. They will still attend labs and be responsible for all material presented in lab. All students are required to take the laboratory practicals which will include material from the cadavers.

**Students with Medical Conditions:**
Please inform the instructor of any medical condition which may render you unable to attend or perform normally in the classroom. These medical conditions include, but are not limited to Diabetes, Epilepsy, Asthma, Pregnancy etc. Some medical conditions may prevent contact with the cadaver, so it is important to inform your instructor of a current or changing medical condition. In the event of a medical emergency, it is helpful if the instructor already has some knowledge of your condition so as to best assist you.

**Extended School Closure:**
In the case of an extended school closure, you are expected to continue to learn the material according to the semester schedule. You may be asked to perform labs using the PAL 3.0 using the publisher website. Announcements about how to proceed will be posted on the online portion of the course under Course News.

**Classroom Etiquette: Students will respect each other and the instructor at all times.**
1. Students are expected to encourage one another in their learning pursuits. The discussion board or emails are the best way to do this.
2. Any questions about the material can be posted to the discussion board to start a conversation.
3. Any specific questions about grade or test questions should be emailed to the instructor.
4. The discussion board is not to be used to complain. If you have a legitimate complaint, email it to the instructor.
