

INTRODUCTION

We are pleased that you are considering transferring to Maryville College. The Maryville College academic program prepares students for an enriched life as citizens, leaders, and educated persons. A total learning experience is provided at Maryville and is most fully-realized when students take advantage of the many educational opportunities we offer.

Maryville College offers two degrees: the Bachelor of Arts and the Bachelor of Music. The fields from which these majors may be selected are found on pages 4-47 of this document. To receive either degree, a student must complete all of the degree requirements specified in the catalog at the time of initial enrollment. A minimum of 128 semester hours of credit must be earned with a cumulative grade point average of at least 2.00.

Generally, academic courses at Mississippi State Technical Community College in which the student has earned a grade of "C" or above can be transferred to Maryville College and applied toward Maryville College graduation requirements. At a minimum, each degree candidate must complete 45 credit hours at Maryville College including 20 in the senior year and nine in the major field. These credit hours must be earned in regular courses taught at the College and may not include internships, practica, student teaching or credit by examination.

For additional information, please visit the Maryville College website at www.maryvillecollege.edu or call the MC Office of Admissions at 865-981-8092.
