**Global Issues in Context** offers global perspectives on issues of international importance and current world events and topics in the news related to these issues. Not a pro and con database, **Global Issues in Context** is a truly non-U.S. centric resource that ties together a variety of sources to present a rich analysis of issues — providing information seekers with a framework to better understand 21st-century issues and events while highlighting global connections and the interdependence of all nations.

**Global Issues in Context**'s well-organized and easy-to-navigate interface opens up a world of news coverage and extensive multimedia features — including video, downloadable audio files and interactive statistics.

**Global Issues in Context** focuses on broad issues, such as war, genocide, terrorism, human rights, poverty, famine, globalization, world trade, nuclear proliferation, and global warming, as well as more specific events and topics in the news that are related to these broader issues.
